

Luna Duo-tec MP+ 50-150 kW

Wall hung commercial condensing boilers

The range of high output wall hung boilers LUNA DUO-TEC MP + consists of condensing heat generators for heating only, with output between 50 and 150 kW (50/30°C).

Main features:

- **high modulation ratio (1:9);**
- nominal **efficiency 50/30°C: 105%;**
- **high efficiency full modulating circulating pump** included in the boiler;
- **heat exchanger** with combustion chamber and stainless steel coil hydraulic system, single chamber models from 50 to 70 kW, double chamber models 90 - 150 kW
- low water content in the exchanger that means very limited thermal inertia and therefore a rapid response to the variations in thermal energy required by the system;
- premixing unit with double clapet technique, ensuring that the burner constantly has an optimal air/gas ratio independently from the number of fan revs, keeping consumption to a minimum and always guaranteeing correct combustion and consequently a reduction in polluting emissions;
- **NTC sensor on flow and return** for a more precise modulation;
- **digital PCB with latest generation double microprocessor;**
- control panel with large back-lit LCD;
- **stainless steel burner** for 1.50, 1.70, 1.90, 1.130 and 1.150 models and metallic fiber for 1.110 model;
- adjustable speed fan and insulation for a noiseless operation;
- **electronics that allows great flexibility** in highly diversified contexts. With specific accessories that can also be installed inside the boiler, it is possible to control mixing zones, daily and weekly programming of heating and sanitary functions, cascade, recirculation and other functions;
- 0-10 V control available as optional;
- accessories for single or cascade installation, for wall hung mounting or with metal frame;
- hydraulic accessories to install from 2 to 6 boilers in cascade;
- operation with natural gas and LPG (with LPG conversion kit).
