

Radiators

Responsive and flexible heating

Warm water radiator central heating is the best way to heat both new and existing Kiwi homes. Not only does it deliver much higher levels of comfort, it responds the best to our changeable weather and busy lifestyles giving us exactly what we need when we want it.

Radiators provide a responsive and flexible heating option for both new and existing homes. They heat up and cool down quickly, so are ideally suited to New Zealand's changeable weather conditions and the typically busy lifestyles of New Zealanders.

Quality European Radiators

Central Heating New Zealand stocks high quality European DeLonghi and Korado radiator ranges, as well as designer radiators made by DeLonghi, Koratherm, Radiatori, Arroll, Ridea and Scirocco. These eye-catching radiators combine thermal efficiency and aesthetics to complement interior design or act as a focal point.

- Radiant heat with no forced air movement
- Quick response time (around 10 minutes to warm up)
- Variety of styles; endless colour options
- Operates at safe temperatures, between 60°C and 75°C
- Can be turned off individually or as a system

Available Models

DeLonghi Steel Panels Radiators

Central Heating New Zealand stocks DeLonghi's Steel Panel Radiators as standard. They are available in two common types: Type 21, which is 66mm thick; and Type 22, which is 100mm thick. They are available in sizes ranging from 400 to 2300mm wide and 300 to 900mm high. These types and sizes affect the amount of heat that the radiator puts out.

Korado Line and Universal Radiators

Korado radiators are premium European-made heating solutions offering performance, flexibility, and style. The Korado Line features a smooth, linear steel panel with a contemporary finish, available in heights from 400 to 600mm and lengths from 400 to 1,800mm. With 21 and 22 panel configurations, outputs range from 277 to 3,715W. Its slim profile, low water content, and 8-port connection make it ideal for modern residential and commercial spaces.

The Korado Universal offers similar performance with a traditional profiled steel front and reversible design. An optional clip-on decorative panel is available as an add-on, supplied separately for easy handling and quick on-site installation. This two-part system allows for either a clean, uniform look or a modern aesthetic. It's ideal for projects where both function and design matter.

Designer Radiator Range

Central Heating New Zealand also stocks designer radiator models in a range of modern and traditional styles. Many people highlight these as decor features in their home because of their unique visual appeal, although their output is usually somewhat lower than models in the standard range. It also provides a nice stylistic contrast in contemporary settings. The designer range and is available by indent order only.

Radiator System Design Considerations

Central Heating New Zealand designs each radiator system for maximum efficiency based on your home's layout and heating needs. Key design factors include placing radiators in the coldest part of each room (e.g., under windows), avoiding heat-blocking barriers like drapes and headboards, and ensuring every room and multi-storey landing has a radiator. Properly designed systems often exceed recommended energy output, even in very cold conditions. Our engineers determine the radiator types and sizes needed. To protect and extend system life, a Fernox inhibitor should be used to prevent corrosion.

Product Code	Style	Stock
